

## **Backflow Device Installations**

1. A design data sheet with plans showing the method of protection must be submitted to the North Brookfield Water Department.
2. All design data sheets must be reviewed by the Cross Connection Program Coordinator and a certified cross connection surveyor prior to the installation of any backflow prevention device.
3. Design Data Sheet Approval Letter or Installation Deficiency letter will follow
4. Must have copy of plumbing permit/fire department approval before installation
5. Inspection of installation by the North Brookfield Water Department
6. Testing of backflow device by certified cross connection tester within 14 days of installation.
7. Copy of test results must be forwarded to the North Brookfield Water Dept.
